

JBC PEDAL

The foot switch makes the tool enter **Sleep** or **Hibernation Modes**, causing no thermal stress when the component is placed on the PCB. Ideal for working with tweezers. It uses for Solder Feed.

The **P005** can also act as a start/stop button when used with modules, Hot Air Stations and Preheaters.

The **P105** is the equivalent for NAST & NANT Stations.

The **P305** work with only the tool port to which it is connected and is compatible with all control units and the discontinued DD, DM, HD.

The **P405** This foot switch makes the tool enter Hibernation mode. Ideal for working with tweezers.
