## **INSTRUCTION MANUAL**

### **GALE**

Guide Kits for ALE250

This manual corresponds to the following references:

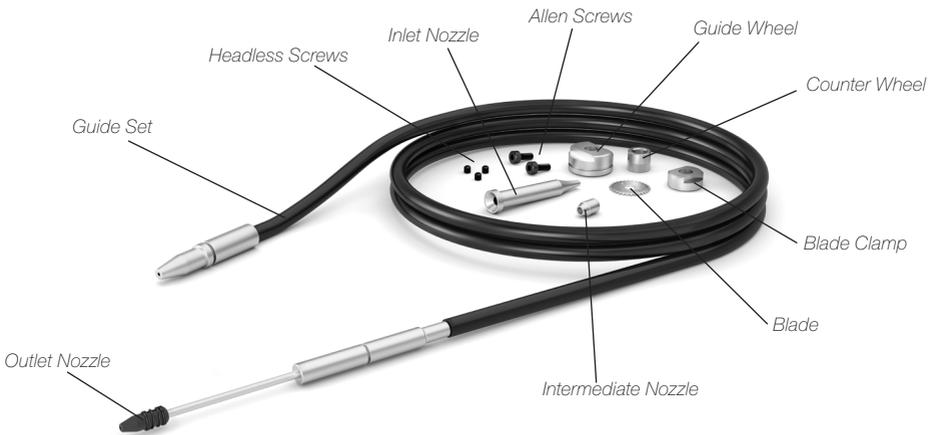

With Solder Wire Perforation:

- GALE08V-A** for wire Ø 0.8 mm / Ø 0.032 in
- GALE10V-A** for wire Ø 1.0 mm / Ø 0.040 in
- GALE12V-A** for wire Ø 1.2 mm / Ø 0.047 in
- GALE15V-A** for wire Ø 1.5 mm / Ø 0.059 in
- GALE16V-A** for wire Ø 1.6 mm / Ø 0.063 in

Without Solder Wire Perforation:

- GALE04D-A** for wire Ø 0.38 - 0.4 mm / Ø 0.015 - 0.016 in
- GALE05D-A** for wire Ø 0.46 - 0.56 mm / Ø 0.018 - 0.022 in
- GALE06D-A** for wire Ø 0.60 - 0.64 mm / Ø 0.023 - 0.025 in
- GALE07D-A** for wire Ø 0.70 - 0.78 mm / Ø 0.028 - 0.031 in
- GALE08D-A** for wire Ø 0.80 - 0.82 mm / Ø 0.032 - 0.033 in
- GALE10D-A** for wire Ø 0.90 - 1.10 mm / Ø 0.036 - 0.044 in
- GALE12D-A** for wire Ø 1.14 - 1.27 mm / Ø 0.045 - 0.051 in
- GALE15D-A** for wire Ø 1.50 - 1.57 mm / Ø 0.060 - 0.063 in
- GALE16D-A** for wire Ø 1.60 - 1.63 mm / Ø 0.063 - 0.065 in
- GALE18D-A** for wire Ø 1.8 mm / Ø 0.073 in

## GALE Guide Kits for ALE250 with Solder Wire Perforation

### Packing List

The following items are included:

- Guide Set\*** ..... 1 unit
- Inlet Nozzle\*** ..... 1 unit
- Guide Wheel\*** ..... 1 unit
- Counter Wheel\*** ..... 1 unit
- Blade Clamp\*** ..... 1 unit
- Blade\*** ..... 1 unit
- Intermediate Nozzle\*** ..... 1 unit
- Outlet Nozzle\*** ..... 1 unit

- Allen Screws\*** ..... 2 units
- Headless Screws\*** ..... 3 units

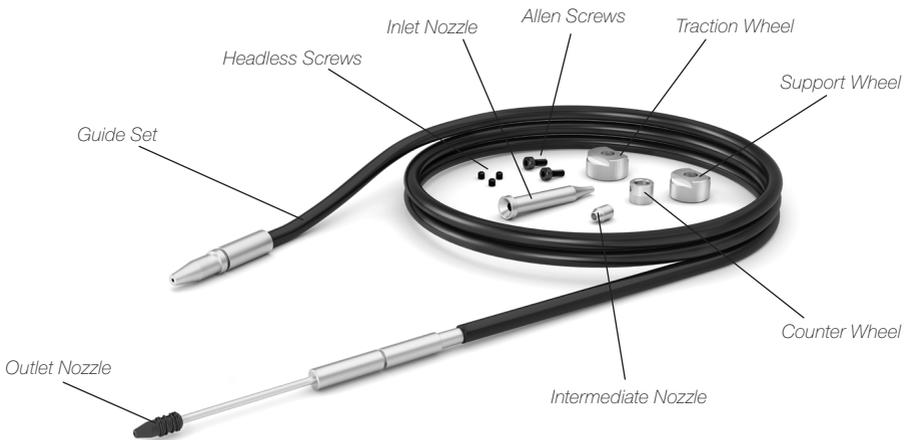

- Manual** ..... 1 unit

\*see reference table on page 4

Ref. 0028365

## GALE Guide Kits for ALE250 without Solder Wire Perforation

### Packing List

The following items are included:

<b>Guide Set*</b> .....	1 unit
<b>Inlet Nozzle*</b> .....	1 unit
<b>Traction Wheel*</b> .....	1 unit
<b>Support Wheel*</b> .....	1 unit
<b>Counter Wheel*</b> .....	1 unit
<b>Intermediate Nozzle*</b> .....	1 unit
<b>Outlet Nozzle*</b> .....	1 unit

<b>Allen Screws</b> .....	2 units
<b>Headless screws</b> .....	3 units

<b>Manual</b> .....	1 unit
---------------------	--------

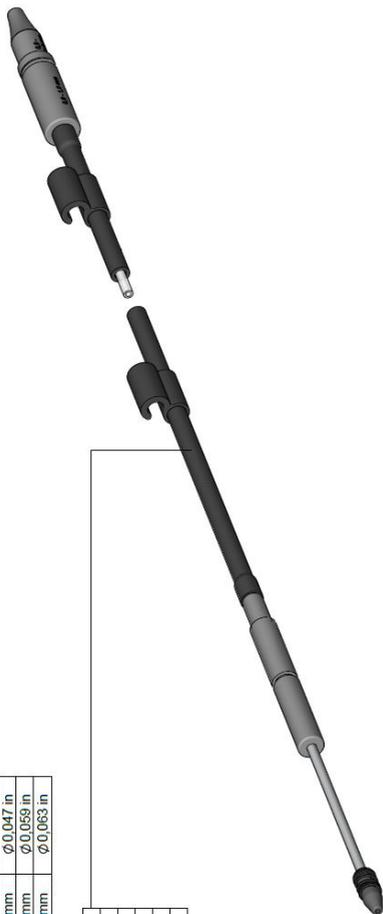

\*see reference table on page 5

Ref. 0028365

# GALEXV-A WITH SOLDER WIRE PERFORATION

XX	Wire diameter
06	Diameter of use Ø 0,8 mm    Ø 0,032 in
10	Ø 1,0 mm    Ø 0,040 in
12	Ø 1,2 mm    Ø 0,047 in

GALE18D-A										

## Guide Tube Set Assembly

Open the guide tube set screw (1) and insert the guide tube set.

Adjust the guide tube length (2). Leave a gap of 8 to 10 mm (0.31 to 0.39 in) between the tip and the outlet nozzle (3). Once the position is adjusted tighten the guide tube set screw (1).

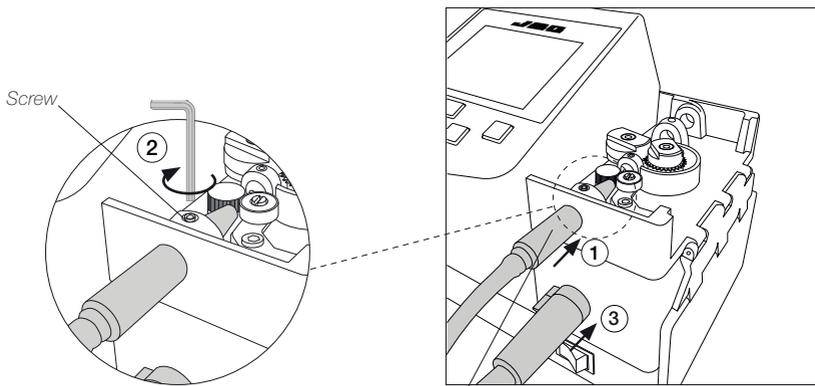

For a better handling use the clips (4) to attach the guide tube to the tool cable.

## Tool Assembly

Connect the tool to the control unit following these steps:

Loosen the set screw, insert and push the guide nozzle until it stops (1) and tighten the set screw (2) again. Then plug in the tool connector (3).

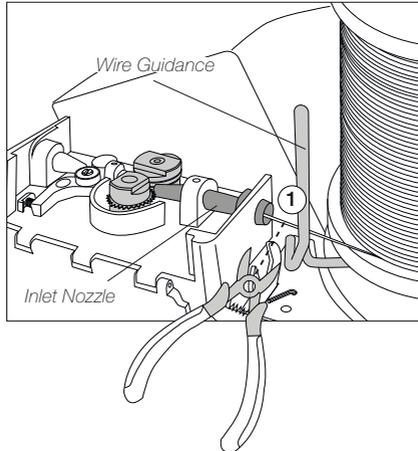

*Insert all the way in until it stops*

## Solder Wire Unloading

### With Solder Wire Perforation

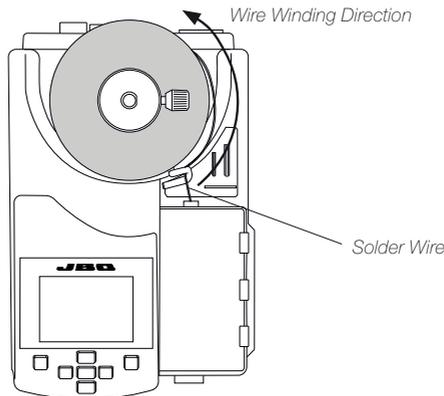

To unload solder wire with perforation that has already passed through the guide tube, cut the wire between the wire guidance and the inlet nozzle (1). To extract the wire out of the tube, hold the tool on your hand and press  until the wire stops moving forward. Grasp the wire coming out of the outlet nozzle with a pliers and pull from it until it is completely out.

### Without Solder Wire Perforation

When using a kit without solder wire perforation, press  until the wire is completely wound to unload the solder wire. It is best to rotate the reel by hand as the wire is being pulled back in order to keep it neatly arranged on the reel.

Or, if preferred, proceed as described before for perforated solder wire unloading.

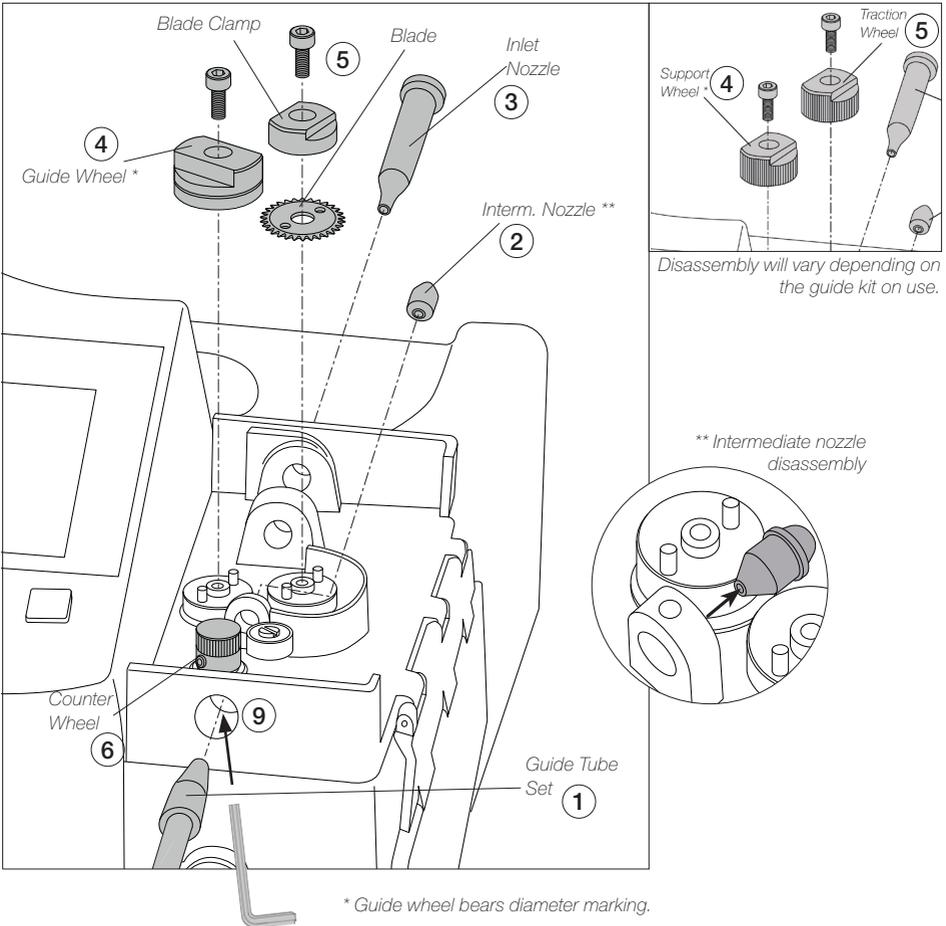

# Changing Guide Kits

## Disassembly

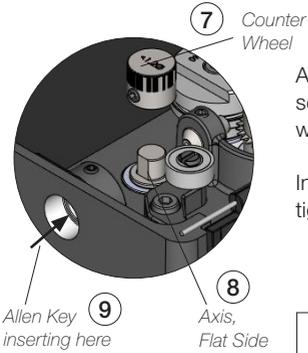

For this operation, disconnect the device from the mains. Unload any solder wire running inside the guide tube, disconnect the tool from the control unit and open its cover.

Before trying to remove any components from the device, be sure to loosen the corresponding set screws. To do this, use the Allen key and spanner provided with the station. First disassemble the guide tube set (1), the guide wheel, blade and blade clamp or the support and traction wheels (4) + (5), and then the nozzles (2) + (3). Lastly, disassemble the counter wheel (6). Introducing the Allen key through the frontal opening (9) will make it easier to loosen the screw of the counter wheel.

**Note:** The assembly steps are slightly different for devices with or without solder wire perforation.

**Assembly with Solder Wire Perforation:**

Assemble the counter wheel (7). Make sure that its thread entry for the set screw is aligned with the flat side of the axis (8). If not, the set screw will protrude, which may cause difficulties for the wire transportation.

Inserting the Allen key through the front opening will make it easier to tighten the screw (9).

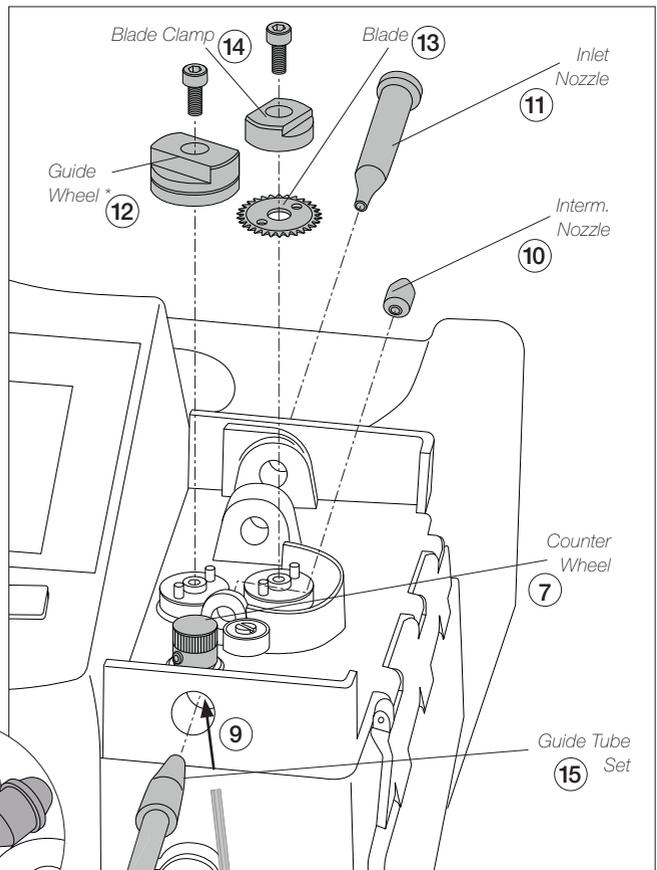

Insert the intermediate nozzle (10) until its collar rests against the housing and tighten its screw.

Assemble the inlet nozzle (11).

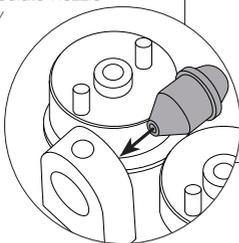

Assemble the guide wheel\* (12) and tighten the screw.

Assemble the blade first (13), then mount the blade clamp (14) onto the same axis and tighten the screw. **Caution:** handle the blade carefully to avoid injury.

Finally insert the guide tube set (15).

\*\* intermediate nozzle assembly

\* Guide wheel bears diameter marking.

**Assembly without Solder Wire Perforation:**

Assemble the counter wheel in the same way as shown on the previous page (7), (8) and (9).

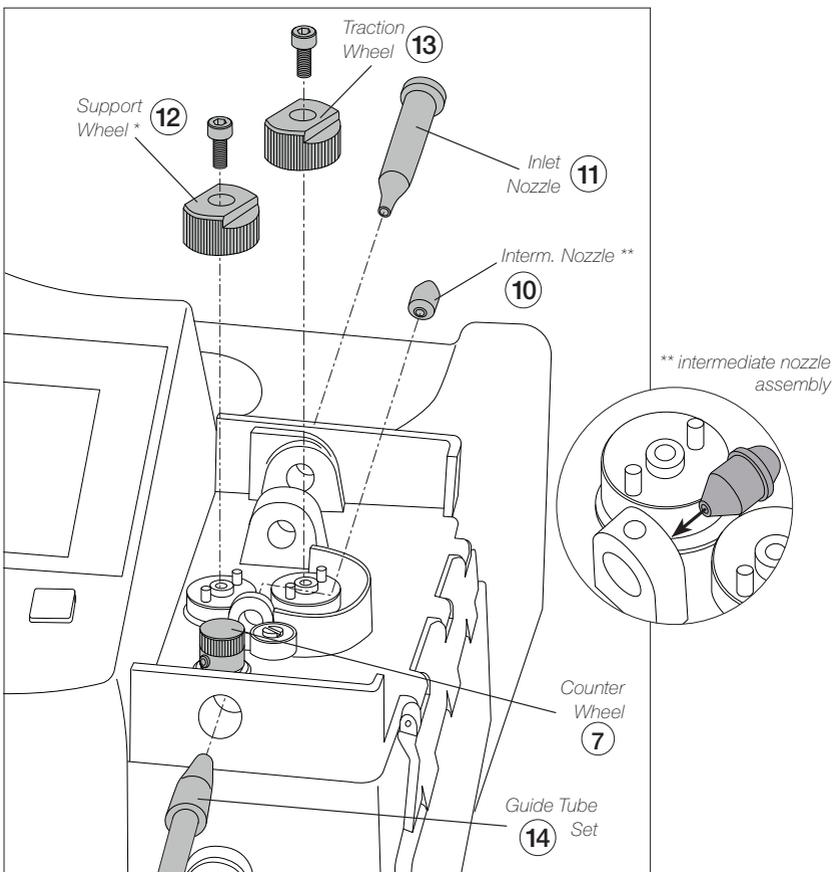

Insert the intermediate nozzle (10) until its collar rests against the housing and tighten its screw.

Assemble the inlet nozzle (11).

Assemble the support wheel\* (12) onto the axis and tighten the screw.

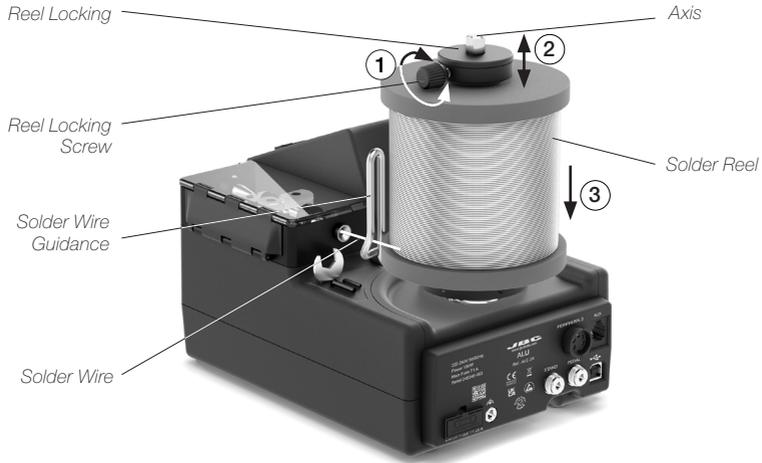

Assemble the traction wheel (13) onto the axis and tighten the screw.

Finally insert the guide tube set (14) and tighten the screw.

\* Support wheel bears diameter marking.

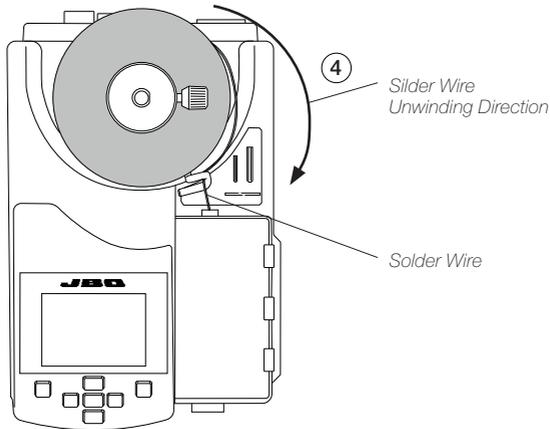

## Solder Reel Assembly

Loosen the reel locking screw (1) and remove the reel locking (2) from the axis.

Assemble the solder reel onto the axis (3).

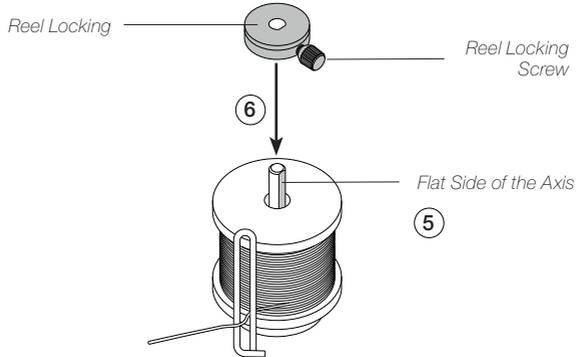

**⚠** Insert the solder reel in such a way - when viewed from above - that the solder wire unwinds on the dispensing mechanism side (4).

To assemble the reel locking, its conical side must be pointing downwards.

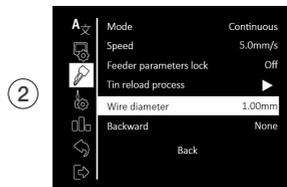

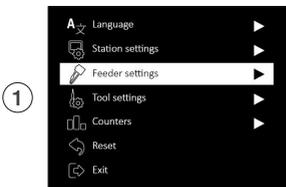

Align the flat side of the axis (5) with the inner flat side (the one with the screw) of the reel locking and reassemble it to the axis (6).

**Note:** To prevent the solder reel from spinning freely or binding, before tightening the reel locking screw gently press the reel locking down, but only enough to have the solder reel secured in place.

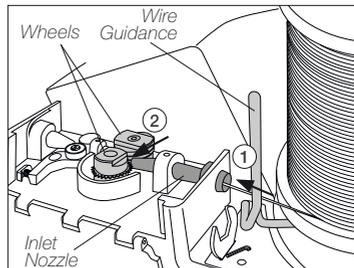

## Main Menu Screen

Access to Main Menu by pressing , select "Feeder settings" (1) and then "Wire diameter" (2) to adjust the value to the current solder wire diameter.

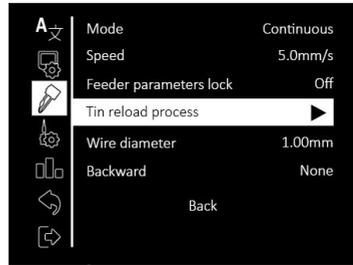

## Solder Wire Loading

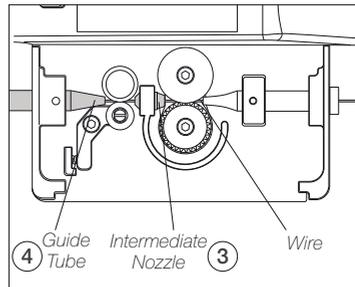

Pass the solder wire through the wire guidance and introduce the solder wire into the inlet nozzle (1) until it reaches the wheels (2).

Select "*Tin reload process*" and then use  to feed the solder wire and advance until it comes out of the outlet nozzle. If needed, carefully push the wire until it gets locked in between the rotating wheels for the wire to start moving forward. Keep  pressed and after a while, the wire will advance faster.

Make sure the wire passes through the intermediate nozzle (3) and enters the guide tube (4).

## Replacing Guide Sets

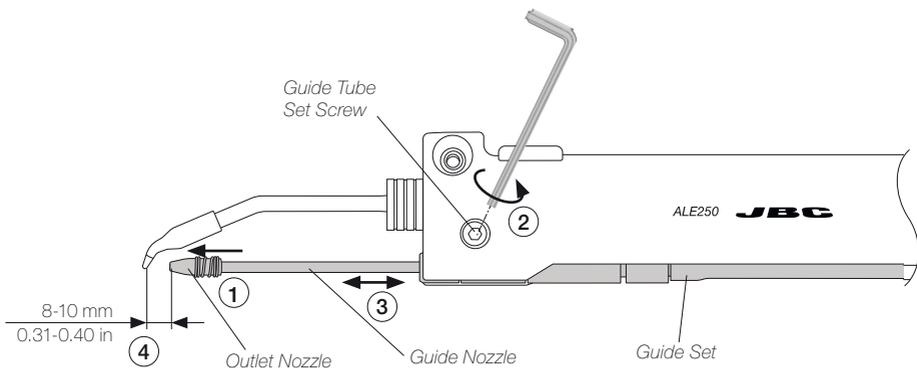

Once the tool is disconnected from the control unit and has cooled down, follow these instructions:

Unload the solder wire and disassemble the outlet nozzle (1) from the guide set.

Loosen the guide tube set screw (2), take out the guide set (3) and insert the desired one.

Put the outlet nozzle (1) back on the new cartridge. Leave a gap of 8 to 10 mm (0.31 to 0.39 in) between the cartridge tip and the outlet nozzle (4).

Once the guide nozzle length is adjusted tighten the guide set screw (2).

## Specifications

### GALE

#### Guide Kits for ALE250

##### With Perforation:

Ref.: **GALE08V-A** wire  $\varnothing$  0.8 mm /  $\varnothing$  0.032 in

## Warranty

JBC's 2 year warranty covers this equipment against all manufacturing defects, including the replacement of defective parts and labour.

Warranty does not cover product wear or misuse.

In order for the warranty to be valid, equipment must be returned, postage paid, to the dealer where it was purchased.

**Get 1 extra year JBC warranty by registering here:**

**<https://www.jbctools.com/productregistration/>  
within 30 days of purchase.**

---

This product should not be thrown in the garbage.

In accordance with the European directive 2012/19/EU, electronic equipment at the end of its life must be collected and returned to an authorized recycling facility.
